^ COLLAPSE ^

Visit w3schools and go to the Java Tutorial section: https://my-learning.w3schools.com/tutorial/java
Complete the following readings
    Strings Lessons 5.1 - 5.4
    Methods Lessons 10.1-10.5
    Classes Lessons 11.1 - 11.6, 11.15, 11.21
    File Handling Lessons 12.1 - 12.4

Guide:

Make sure you're in the main branch locally and `git pull origin main` any pending changes
Make a new branch per the recommended branch name below (git checkout -b ...)
Fill in the items in the worksheet below (save as often as necessary)
Once finished, export the worksheet
Add the output file to any location of your choice in your repository folder (i.e., a Module2 folder)
Check that git sees it via `git status`
If everything is good, continue to submit
    Track the file(s) via `git add`
    Commit the changes via `git commit` (don't forget the commit message)
    Push the changes to GitHub via `git push` (don't forget to refer to the proper branch)
    Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
    Open and complete the merge of the pull request (it should turn purple)
   Locally checkout main and pull the latest changes (to prepare for future work)
Take the same output file and upload it to Canvas
    *This step is new since GitHub renders the PDF as an image the links aren't clickable so this method works better
    *Remember, the github process of these files are encouragement for your tracking of your progress

Task #1 - Points: 1

Text: Reflect on the topics and refer to the checklist of this task

Checklist

*The checkboxes are for your own tracking

#	Points	Details
☐ #1	1	Mention specifics of what concepts/topics were totally new to you.
☐ #2	1	Mention specifics of what concepts/topics you already knew.
☐ #3	1	Mention specifics of any topics you still don't feel confident about. If everything makes sense so far you can mention so.
☐ #4	1	At least a few reasonable sentences.

Response:

There were quite a few lessons that were completely new to me. Some of it were such as ArrayList and linking that list. Another one is hashlist where you are able to have auto input. Those were few examples that i felt that were quite completely new to me. Some topics that i feel still uncomfortable were polymorphism and inheiritance. Due to how complicated these topics were as confusing in CS113
